EDUCATION

- **National Institute of Engineering, Mysore** Mysore, India
Bachelor of Engineering - Computer Science; GPA: 8.52/10.0 2024
- **Indian Institute of Technology, Madras** Madras, India
Bachelor of Science - Data Science; GPA: 8.00/10.0 2024

SKILLS SUMMARY

- **Languages:** C++, C, Java, Python, JavaScript, TypeScript, Go
- **Frameworks/Libraries:** React.js, Node.js, Express.js, Django, Flask, FastAPI, Selenium, Jest
- **Tools:** Unix and Shell Scripting, AWS, Firebase, MongoDB, PostgreSQL, MySQL
- **Platforms:** Web, Mobile (React Native)

EXPERIENCE

- **Longshot.ai** Remote
Full Stack Intern 2 months
 - **FastAPI Microservices Development:** Contributed to building FastAPI microservices for the core product, which generates fact-checked SEO-friendly content and features.
 - **Automated Testing with Selenium:** Developed automated tests using Selenium to ensure the quality and functionality of the application.
 - **Fixed Bugs in Backend:** Identified and resolved bugs in the backend to improve the stability and reliability of the application.
 - **Full Stack Development:** Worked on various aspects of full stack development, including frontend, backend, and database management.
- **Careerflow.ai(TechStars '23)** Sunnyvale, California (Remote)
Software Engineering Intern 6 months
 - **Subscription Model Development:** Led the software development of a subscription model for a job tracking system SaaS application and a Chrome extension, enhancing the company's product offering.
 - **Business Systems Development:** Pioneered the creation of business systems and client projects from scratch, contributing to the software development life cycle (SDLC) of core products by implementing features requested by thousands of users.
 - **AI Tools Development:** Leveraged technologies such as React.js, Node.js, Express.js, Firebase, and LLMs to build AI tools and features for premium users. (AI Post Generator, AI CoverLetter Generator, AI About Section)
- **SportsKPI** Mysore
Full Stack Intern 5 months
 - **Full Stack Web Applications Development:** Engineered full stack web applications using React.js, Django, MySQL, and AWS EC2, enhancing the company's web presence.
 - **Football Analytics SaaS Application:** Developed a SaaS platform for client teams to track match recordings, performance, player data, and other key data points, improving the company's data management.
 - **Kabaddi Scouting Application:** Built Kabaddi Scouting application for client coaches to track kabaddi players and their performance. Player data fed by local scouts.

PROJECTS

- **URL Shortener (Babylink):** Developed using Go Fiber, PostgreSQL, and React.js. This project showcases my ability to work with different technologies to create practical applications.
- **Chrome Extension:** A software tool that assists users in saving data of interesting LinkedIn profiles. Built with Plasmio, React.js, TypeScript, and Firebase, demonstrating my skills in frontend development and database management.
- **Sports Analytics SaaS Application:** A web-based application built using Django and React.js, demonstrating my ability to develop complex web applications.
- **Bloggng Application:** A web application developed in Nest.js and React where college seniors put their interview experience for companies visiting the campus for our college.
